

## Introduction of myself

My name is Javier de Bustos and I am writing to tell you a little about myself. I was born in Mexico City, a city located in the centre of Mexico. I have a little brother who is 12 years old. My father is the director of marketing for an insurance company and my mother is a primary school teacher. I decided to come to Canada to increase my English skills and to have a new and fun experience.

My favorite subjects are history and geography. I like to run and to bike and I love nature and snow. At Alexander Galt, I have been able to know people from all over the world and to make friendships that I'm sure will last with me forever. I have been able to improve my English skills and to learn some French. With my host family, I have passed a wonderful time exploring new places and sharing new experiences. I would definitely recommend this program to anyone in the world.

Thank you,

*Javier*
